## Raytheon Beechcraft 1900D Airliner

The Raytheon Beechcraft 1900D is a fast, 18-passenger, pressurised twin-engine turbo prop aircraft. Capable of operating out of short runways together with its high speed and increased load capacity, its reputation as the most successful airliner in its class is well deserved. Capable of transporting up to 18 passengers or cargo economically in air conditioned comfort up to 1200nm, the 1900D is the first choice for many airlines and charter organisations worldwide.

The Beechcraft 1900D is certified to FAR Part 23 "Commuter Category" standards which ensures considerably increased performance safety margins over those of smaller aircraft with a maximum takeoff weight less than 5700kg.

The Beech 1900D is the only commuter aircraft in its class which has a walk in, stand up cabin. The cabin allows passengers to comfortably walk from one end to the other. It is this feature that sets it apart from all other aircraft in its class, making it a favourite with passengers. Other features of our comfortable modern cabin are Leather seats, ample legroom, a wide aisle and toilet.

### Beech 1900D Aircraft Specifications

Crew: 2.  
Capacity: 18 passengers  
Cruising speed: 260 knots (480 kmh)  
Range: 1,200 nm (2,200 km)  
Maximum Takeoff Weight: 7,668 kg  
Useful Load: 1,700 kg  
Maximum Cruising Altitude: 25,000 feet
